Subject: RE: Update

The normal DMR can be used. Mark up at the top "WWTP Lagoon Discharge". Do you have access to a spot where you can get a sample of the combined effluent from the lagoon and wwtp. If there is one, please take a grab sample and report that separately. The lab sheet is okay. If you have not already submitted it, the impact analysis should also be submitted.

John

Subject: Update

We are scheduling Staab to begin work next Monday on the digester. I have attached the schedule. Am I to be submitting anything else associated with the WWTP lagoon discharge? If so what format would you like it in? Normal DMR form?
